

AN IMPORTANT MESSAGE FROM IATSE LOCAL 115

Opportunistic politicians are pushing a state constitutional amendment on property taxes that will severely cut funding for our local governments and slash the services we rely on while doing nothing to fix Florida's unfair tax system. They are trying to trick working families into trading in Florida's future for \$20 per month so Big Business, part-time residents and wealthy beachfront property owners can get a tax haven.

WHAT IS \$20 WORTH TO YOU?

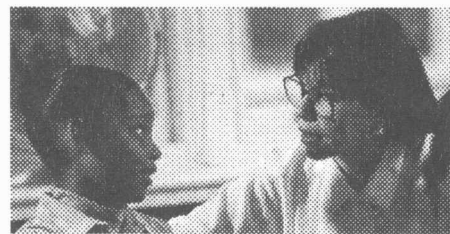

- More than \$12 billion in cuts to police and fire departments, local health care programs, road and infrastructure construction, senior centers and after-school programs?
- Increased fees for essential services that will eat up much more than \$20 per month?
- Some \$3 billion in cuts to your children's schools in the next five years, even though Florida already ranks 48th in the nation in education funding?
- Road-building and construction projects canceled, threatening thousands of private-sector jobs?
- An even more unfair tax system that helps Big Business and beachfront millionaires at the expense of working families?
- Massive layoffs for public-sector employees, who make up more than 80 percent of Florida's union movement?
